- (1) Pollution.
- (2) Global Warming.
- (3) My favorite movie.

Q-4. Read the paragraph and re-write. It in 1/3 (Precis Writing) 10

"One great defect of our civilization is that it doesn't know what to do with its knowledge. Science as we have sun has given us powers fit for the gods yet we use them like small children. For example, we don't know how to manage our machines and machineries. Machines were made to be servants of human being. Yet become too dependent on human race in a fair way to become mother over it and already we find it different either to work or to play without machines and a time may come when machines will rule over us, just as we rule and treat with animals and creators.
